

Setup instruction

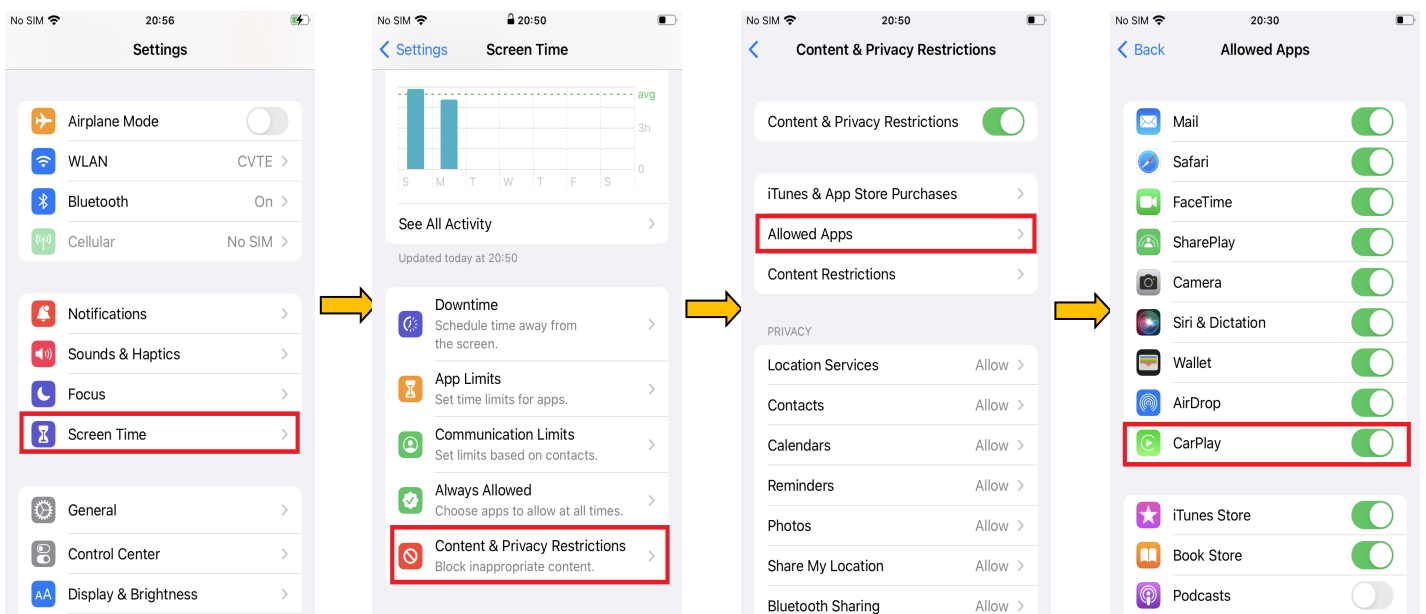

Using Apple CarPlay with a USB cable

First connection

- The Apple CarPlay icon is grayed out on the home screen.

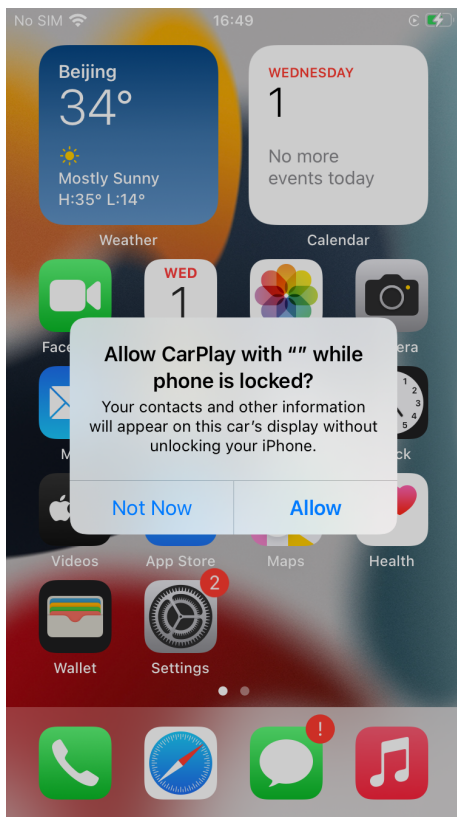

- Make sure the CarPlay switch ON in Allowed Apps, like the operation as below.

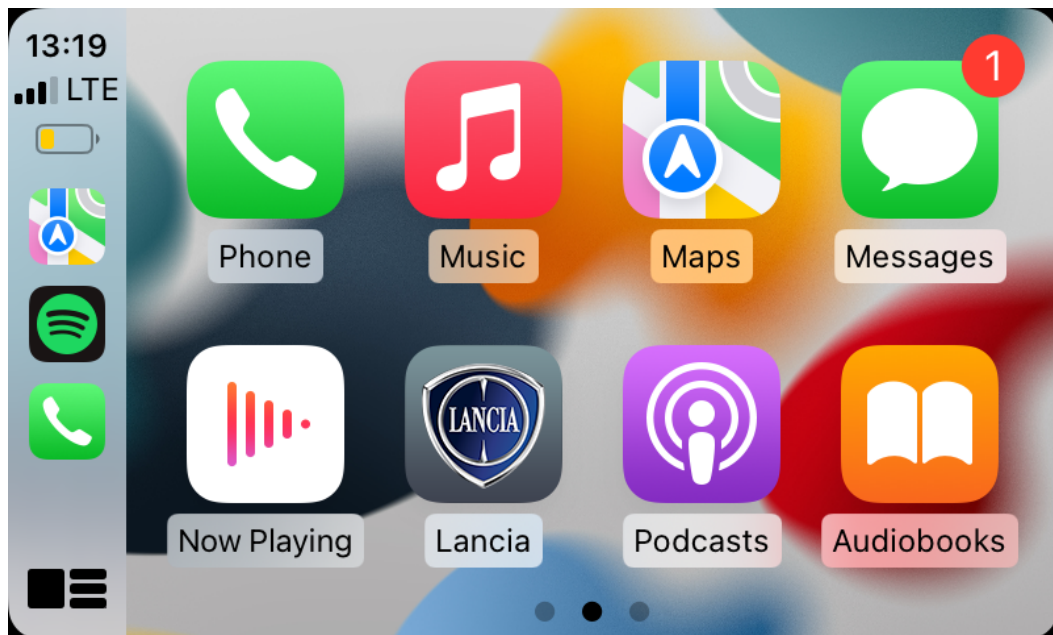

- If not, Apple device will connect to iPod when connecting.

- Connect an Apple-compatible device with the USB cable.
- For the first time to connect, please select your contacts and other information will be Allowed or Not Now to appear on the car's display without unlocking your phone.

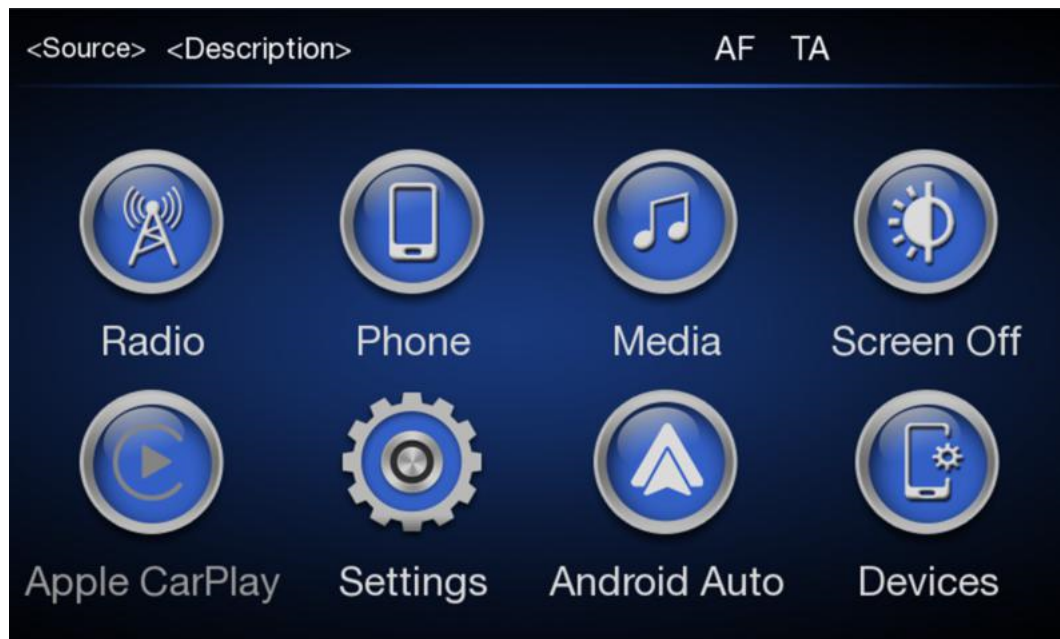

- Apple CarPlay projection mode will be displayed.

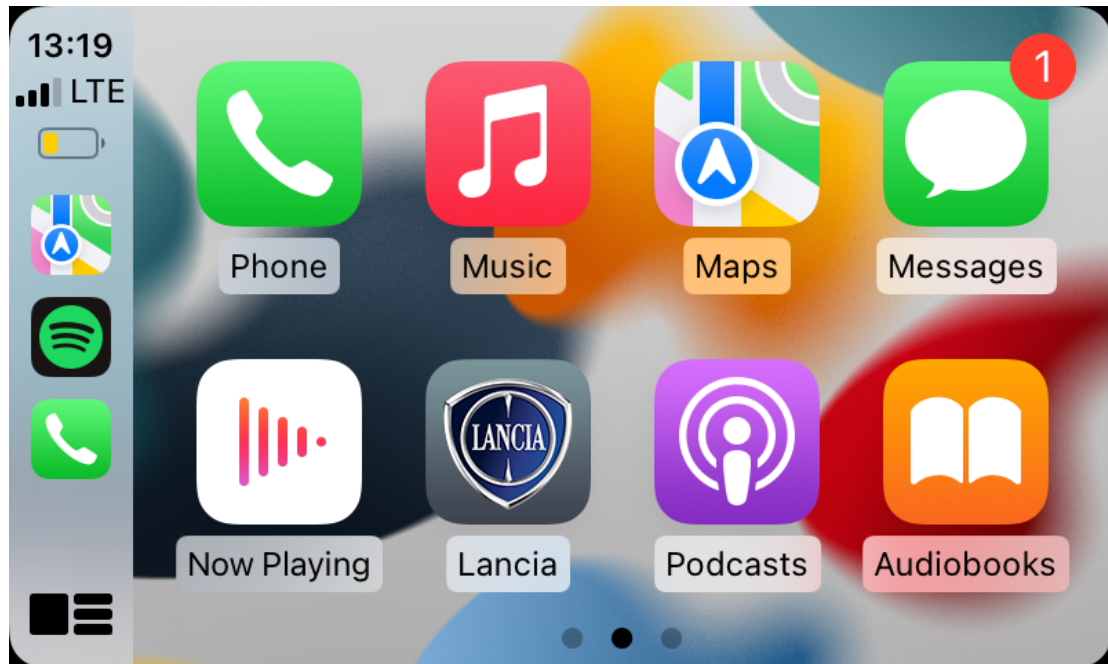

Second or subsequent connections

- The Apple CarPlay icon is grayed out on the home screen.

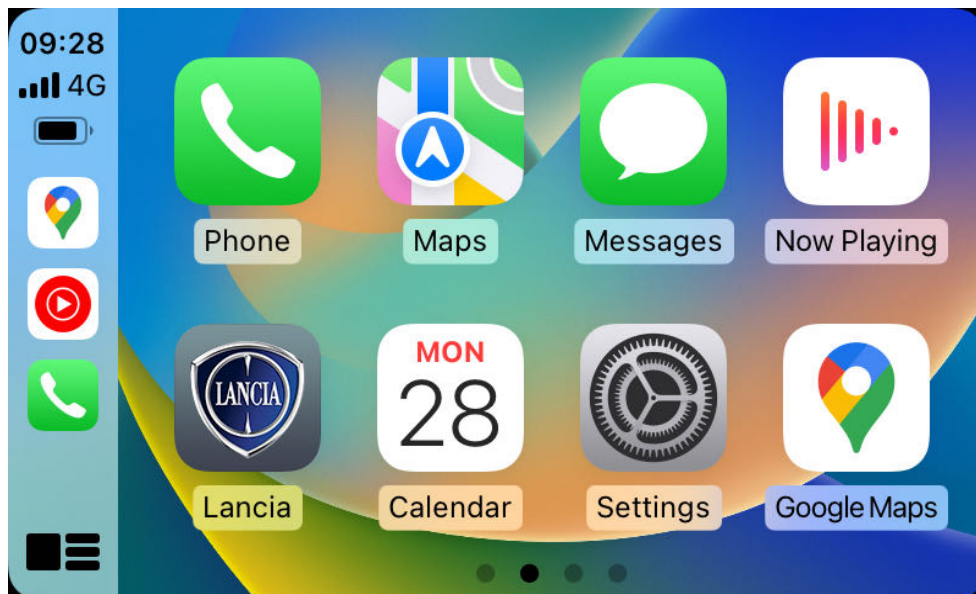

- Connect an Apple-compatible device with the USB cable.
- Apple CarPlay projection mode will be displayed.

Using Apple CarPlay via Wi-Fi connection

- Wireless CarPlay can be used by connecting a wireless projection-supported Apple phone via Bluetooth from the device menu.
- Following flow chart explains the steps of the first connection.

Wireless Apple CarPlay connecting process

How to access Apple CarPlay after connecting

- Tap on Apple CarPlay icon to enter projection mode.

Troubleshooting

If the CarPlay projection isn't working,

- A. Check with the support team if your car is compatible
- B. Check if the device meets the minimum requirement
- C. Check your USB cable, a high-quality USB cable is needed, and avoid using cable extensions
- D. Check device's Bluetooth and Wi-Fi Switch is turned on
- E. Check your settings if you're connecting to a second car:
 1. Unplug your phone from the car
 2. Go to settings in the phone, type "CarPlay" into the search bar, and press "CarPlay Setting".
 3. Remove all previous vehicles from the list by swiping the car name to left.
 4. Try plugging your phone into the car again
- F. Restart the car's infotainment system
- G. Check with the support team if a new firmware update is available
- H. Check if the device network works well when using Siri
- I. Restart the phone

Explanation

Radio is compliant to EU norm "2022/179 of February 2022" which harmonizes the conditions for the availability and efficient use of the frequency bands for wireless access systems including radio local area networks (vehicles included).

Member States shall monitor the evolution of standards and technology in relation to the use of the frequency bands.

In this transition phase sporadic disconnections could occur in case of noises due to external disturbance.

Your WiFi connection will be automatically restored by the radio as soon as the disturbance disappears.
